# Denish Dilshan

Software Engineer

+9476 461 6384 dilshandenish@gmail.com

Portfolio

## Professional Summary

Final-year Software Engineering undergraduate with strong skills in JavaScript, React.js, and full-stack web development. Experienced in building responsive, user-focused applications and real-world projects, including AI-based systems and tourism platforms. Completed a 6-month software engineering internship with hands-on exposure to industry practices, API integration, and agile teamwork. Passionate about creating impactful digital solutions and continuously improving technical expertise.

## Education

**Bachelor of Software Engineering (Hons)**

*The Open University of Sri Lanka — 2021 – 2025*

**Advanced Level**

*ST. Michael's College (National School)*

Bio Stream

## Technical Skills

- Programming Languages: Python, JavaScript, PHP
- Frontend: React.js, Next.js, HTML, CSS, Tailwind, Bootstrap
- Backend: Node.js, Express.js
- Databases: MySQL, PostgreSQL
- Tools & Platforms: GitHub, Docker, Figma, Android Studio

## Internship / Work Experience

**Software Engineering Trainee**

**TRACE Theory to Trade (T2T) — 6 Months**

- Designed and developed responsive web applications, focusing on performance and user experience.
- Collaborated with cross-functional teams to implement features and improve existing systems.
- Integrated RESTful APIs to connect front-end components with backend services.
- Followed Agile/Scrum development practices, participating in sprint planning, stand-ups, and reviews.
- Enhanced technical skills in modern web technologies, version control, and real-world software workflows.

## Main Projects

**Knowledge Dot**

***Online Learning Management System | PHP, Bootstrap, MySQL***

- Worked as a Full Stack Developer in a team project to build a comprehensive learning management platform.
- Implemented backend functionality, database integration, and responsive front-end interfaces.

**Rule-Based Grocery Management System**

***AI Mini Project | Python, Streamlit, Rule-Based System***

- Developed a rule-based intelligent grocery management system as part of an AI coursework project.
- Implemented business rules to manage inventory logic, recommendations, and decision-making processes.
- Built an interactive web interface using Streamlit for real-time system interaction and visualization.

**Decentralized Patient Information System Based on Blockchain Technology**

***Research Project | Blockchain, Healthcare IT***

- Conducted an in-depth research project focused on designing a decentralized patient information system for Sri Lankan healthcare institutions using blockchain technology.
- Analyzed over 20 academic research papers to identify challenges in current healthcare data systems and propose a secure, transparent, and tamper-resistant model.

**AI-Powered Feedback Analyzer (Ongoing)**

***Curriculum Enhancement Tool | AI, Web Technologies***

- Currently developing an AI-based system to analyze student feedback and generate actionable insights for curriculum improvement.
- Working with BERT & T5 Models, Technologies- React.js, Python, SQL

## Interests

- Web Development
- AI integration
- Blockchain

## Languages

- English
- Tamil
- Sinhala

## Technical Demonstrator

**University Open Day**

Participated in the AI Technology Corner, demonstrating AI-related projects and concepts.
